

Use the four operations to solve the problems below.

1. $\frac{1}{2} + \frac{3}{4}$

2. $\frac{3}{5} - \frac{2}{3}$

3. $\frac{2}{15} * \frac{5}{10}$

4. $\frac{5}{6} \div 1\frac{1}{2}$

5. $6 - (-7)$

6. $-5 - 11$

7. $12(-3)$

8. $\frac{-24}{-6}$

9. $2.4 + .09$

10. $11 - 6.3$

11. $-.02 * .02$

12. $6.33 \div .03$

13. $23 + x = 53$

14. $y - 12 = 49$

15. $3a = 10$

16. $25 = \frac{b}{5}$

Complete each table for the value of the missing variable.

17. $y = x + 3$

x	y
2	
3	
4	
5	

18. $y = 2x$

x	y
-1	
0	
1	
2	

19. $y = 3x - 5$

x	y
0	
2	
4	
6
