

**Synergy is Clinton High School's initiative-based learning opportunity.**

Students will work in a professional environment, integrating 21st century skills with content-area Iowa Core standards. Students will choose and design initiatives that they are passionate about and that complement the curricular area they are seeking credit for. For example, a student seeking US Government credit could choose an initiative involving local leaders and a civic issue. Standards not achieved through an initiative will be learned in collaboration with Synergy staff.

**Core credits anticipated to be available through Synergy in 2020-2021 include:**

**US Government  
Diversity Studies**

**English 11  
English 12  
Creative Writing**

**Environmental Sci.  
Exercise Physiology  
Zoology**

**Statistics  
Leisure Fitness**

**Universal Constructs**

If they chose to take Synergy's only unique elective course, Synergy students will learn, experience, and be assessed on growth in the Iowa Core's Employability Standards.

Synergy students can earn Stem Innovator credit through the University of Iowa. This is not a CHS credit, but a risk-free opportunity to obtain college credit for their learning experience.

Synergy staff will continue to explore additional credit opportunities for students and welcome suggestions for curricular possibilities from students, parents, and the community.
